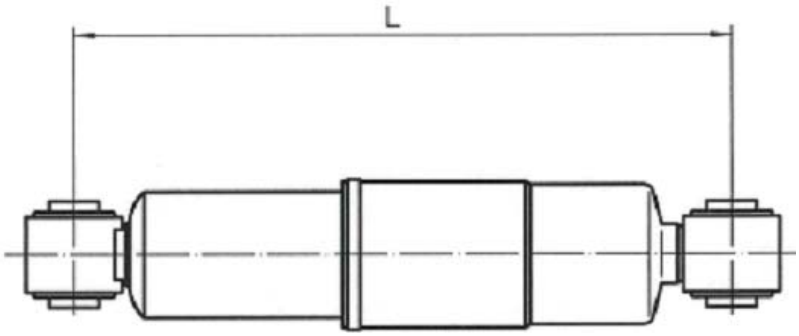
BILSTEIN SHOCK ABSORBERS
How to Measure the Length of a Shock

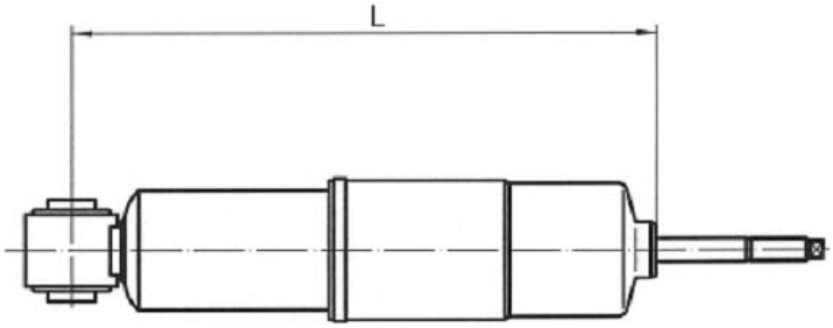
Eye to Eye

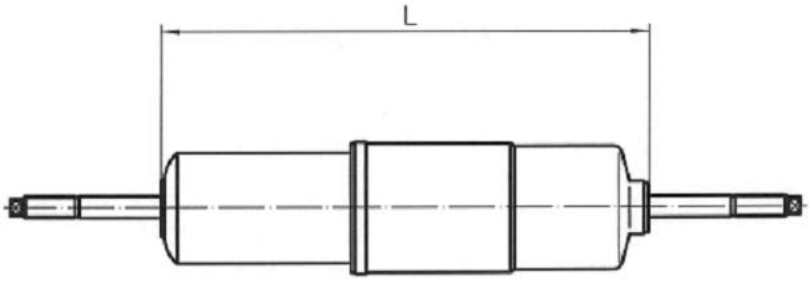
An eye to eye shock is measured from the center of one eyelet to the center of the other eyelet



Pin to Eye

A pin to eye shock is measured from the base of the stem where the mounting hardware rests to the center of the eyelet.



Pin to Pin


A pin to pin shock is measure from the base of the stem where the mounting hardware rests to the base of the other stem where the mounting hardware rests.
